I am applying for a full-time position of Junior Front End Developer. I am applying to support my study and improve my skills even more. I am willing to be trained and would to love be a part of your company!

Soft Skills

- **I am Passionate** - Above my skills, this is what drives me to pursue my career. I love coding. I love what I do. Coding is me. Me is coding.

- **I Love Learning** - I never stop learning. I am very enthusiastic in learning new things. This is my favourite skill of mine.

- **I am Awesome** - I am Creative, Critical Thinker, Detail Oriented, Team Player, Great Listener, and Good Communicator.

Technical Skills

- **HTML** - I know how to properly structure my code. I make sure it passes the HTML Standard Specification.

- **CSS** - I can style good-looking websites. Elegantly. I can make beautiful custom layouts at your heart's content.

- **Bootstrap** - I love Bootstrap. It allows me to build faster, making me focus on the content and experience.

- **Responsive Web Design** - I can build responsive websites without the help of Bootstrap. I ensure all my projects are viewable in all devices.

- **JavaScript** - I know basic JavaScript. For now, I am still learning and daily improving! I love JavaScript!

- **jQuery** - Together with JavaScript, I love jQuery. I know the basics of it. Still learning to better implement it on my future projects.

- **Git** - I know how to use git. Can't wait to work with your devs!

- **Photoshop** - I use Photoshop often to make assets for my projects. I also use Photoshop for creating mock-ups. Yep, a designer job.

- Coming Soon Skills - AJAX, Angular.js, Sass, JavaScript(ES6). Because I love the front end web, I am hungry in learning front end web technologies and skills.
